Professional Summary

Computer Science undergraduate (CGPA: 9.28) with hands-on expertise in full-stack development, AI/ML (Xg boost, Random Forest Models, real-time media processing, and speech-to-text integration. Proven through hackathon wins and projects spanning secure web platforms, cloud architecture visualization, audio-visual signal processing, and clinical AI tooling — with a strong passion for open-source development.

Education

RV College of Engineering – B.E. Computer Science (Sep 28) | CGPA 9.28

Ascent Junior College – 97.2%(Andhra Pradesh State Board) |KVS School– 99.2%(CBSE)

COMEDK Rank 143 | JEE Mains 97.54%ile | Qualified JEE Advanced.

Technical Skills***Languages:*** *Python, C, x86 Assembly Language, MATLAB*

- **Core:** Data Structures & Algorithms, Operating Systems, Database Concepts, Software Testing, Machine Learning (Training, Ensembling & Deployment), Deep Learning, Geospatial Analysis, Signal Processing
- **Frameworks & Libraries:** Node.js, Express.js, React, ReactFlow, TailwindCSS, OpenCV, MediaPipe, pyannote.audio, librosa, NumPy, SciPy, PyAV, TensorFlow/Keras, LightGBM, XGBoost, CatBoost, scikit-learn, Plotly Dash, U-Net / Mask R-CNN / YOLO (CNN architectures)
- **Tools & Platforms:** Git, Google Cloud, Google Earth Engine, Kaggle, Hugging Face, Vercel, Render, Railway, Civo Cloud, Kubernetes, Terraform, Arduino, CLI Tooling
- **Expertise:** Real-Time Audio/Video Processing, Full-Stack Web Development, AI/ML Training and Integration, Cloud Architecture & Deployment, Geospatial & Remote Sensing Analysis, Time-Series Forecasting (LSTM/ConvLSTM), Ensemble ML & Feature Engineering, SPA Architecture, Infrastructure-as-Code (Terraform)

Projects

- **Speaker Detection & Video Cropping** —Python pipeline using pyannote.audio and MediaPipe for automated speaker-centric video cropping. Employs Kalman filters and OpenCV for low-latency, smooth 16:9 transitions in live and file-based streams.

- **CloudCartel** *(Winner, 8th Mile RVCE)* — Visual cloud architecture builder with AI-guided failure simulation and auto-generated Terraform IaC templates.

- **Voice-Enabled Clinical Assistant** — Integrated MedASR(by google) model speech-to-text with Web Audio API silence detection and MediaRecorder capturing in a React architecture, enabling real-time voice command parsing and execution for clinical workflows.

- **AI-Powered Program Profiler** — Real-time CPU,memory and I-O phase detection with deadlock analysis, ML regression-based bottleneck prediction, and optimization recommendations via a Flask REST API

Leadership & Achievements

- Winner-"ADVAYA 2.0", a 24-hour National Level Hackathon(BGS College of Engineering and Technology)
- Winner –Cloud Pirates Hackathon (8th Mile RVCE).
- Participated and 9th place– Neuromorphic Computing Hackathon(IISC Banglore)
- 3rd Place–Avishkar Manthan Ideathon (Malnad College of Engineering)--Startup Connect Platform
- Certified in Google Cloud Study Jams 2025 – 19 Skill Badges + 1 Arcade Game (GDG on Campus, RVCE).
- Certified in Programming in C – Infosys Springboard.

Key Strengths

Problem-solving • Analytical thinking • Clear Communication • Team collaboration • Initiative-driven• Adaptability
